HISTORY

ArchieToken (Erc20) (ARCHIE) was our first project where we started, it was well written in our road map that we will have our Blockchain on our own. Our project was created with our holder in mind, and we have done everything in our ability to keep that word and yet volatile pricing in the crypto market caused our chart a lot.

We have decided as a community to create our own Layer 1 Block Chain and support upcoming Metaverse (Archie Meta) project. The need exists to change the current crypto space where the value of your project is only tied to hype and buying or selling the coin/token. Your project can fail instantly just by hype failing, one whale selling off their holdings, or a pump and dump group coming through. In order to survive long-term, a cryptocurrency project needs to have a product/service that generates revenue and this needs to be what the value is based on. This is what we are doing with Archie Metaverse. The demand for services provided in Archie Metaverse will drive the value of Archie Coin independent of the Crypto Market.

Introduction

ArchieMeta NFT

Exclusive Avatar Model NFTS are the newest addition to ArchieNeko Family. We are introducing this collection to fill the need of "Avatars" that visitors needed in the ArchieMeta. Visitors often will use these avatars in our ArchieMeta to attend a concert or even to visit our Casinos or any other projects.

There will be a total of 150,000 avatars altogether and will be released in 30 phases. These Avatar Models will represent almost all major races and ages to make it interesting and the diversification of our ArchieMeta.

Each character will be named accordingly and released as a separate collection. Benefits will be the same for all but, prices will be different. Earlier phases will have a cheaper price to mint versus later phases will carry higher price tag to build the demand and value
